

BORA AYDIN

SOFTWARE DEVELOPER | FRONTEND + FULL-STACK | REACT | TYPESCRIPT | PYTHON/FASTAPI

Ankara, Turkey | Open to U.S. Relocation Nationwide | **J-1 Trainee Candidate** | +90 505 048 1810 | br.aydin@hotmail.com

github.com/SkyBlueHeat | linkedin.com/in/bora-aydn | [Aviora Live](#)

U.S. J-1 TRAINEE TARGET: FRONTEND | FULL-STACK | PRODUCT ENGINEERING | BACKEND/API | QA AUTOMATION

13 MONTHS PROFESSIONAL EXPERIENCE | 2+ YEARS PRODUCT BUILDING | 94-98 LIGHTHOUSE | REACT/TS + FASTAPI

PROFESSIONAL PROFILE

J-1 Trainee candidate with an Associate Degree in Computer Programming, **13 months of professional software development experience** across two production teams, and **2+ years independently building and shipping React/TypeScript products**. Frontend-focused with hands-on backend/API experience in Python/FastAPI and Node.js integrations. Strong in reusable architecture, REST APIs, automated testing, accessibility, performance optimization, and end-to-end product ownership. Built Aviora from concept to working releases and achieved **94-98 mobile Lighthouse Performance, 1.9-2.3s LCP, and 26-98ms TBT across six regions**.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Vue.js, HTML5, CSS3, Tailwind CSS

Backend & APIs: Python, FastAPI, REST APIs, Node.js REST service integration

Testing & Quality: Playwright, Vitest, Jest, React Testing Library, Accessibility/WCAG, Cross-Browser UI, Lighthouse, Performance Profiling

Product & Tools: 0-to-1 Product Development, Reusable Components, Responsive Design, Git/GitHub, Docker, Vite, Figma (basic), Cursor, Windsurf

PROFESSIONAL EXPERIENCE

Full Stack Engineer - ARMA Group Holding

Feb 2022 - Aug 2022

- Built and shipped reusable Vue.js components and responsive production interfaces integrated with Node.js-based REST services, translating product requirements into reliable UI flows.
- Partnered with backend engineers and QA on API contracts, cross-browser defects, edge cases, debugging, and release readiness across production features.

Frontend Developer - CERS Software

Jul 2021 - Dec 2021

- Converted Adobe XD designs into responsive, pixel-consistent production interfaces using semantic HTML, CSS, and JavaScript; created reusable UI patterns and optimized frontend assets.
- Resolved browser- and viewport-specific issues through QA cycles, improving responsive behavior and production reliability across user-facing interfaces.

SELECTED PRODUCT & ENGINEERING WORK

Aviora - Career Management Platform | [Live](#) | [GitHub](#)

2024 - Present

React | TypeScript | Python | PyWebView | Playwright | Vitest

- Owned the product from concept through working releases; built application tracking, Kanban workflows, analytics, reporting, filters, and interview-preparation tools with reusable React/TypeScript architecture.
- Implemented automated testing, accessible state handling, and performance profiling; achieved 94-98 mobile Lighthouse Performance, 1.9-2.3s LCP, and 26-98ms TBT across six regions.

Agent Evidence - AI Agent Payment Security Lab

2026 - Present

React | TypeScript | FastAPI | REST APIs | Docker

- Designed and built transaction, evidence, findings, and attack-scenario workflows across React/TypeScript and FastAPI REST APIs, with validation plus loading, error, and edge-case handling; containerized with Docker.

MotionKit - Programmatic Motion Design System

2026

React | TypeScript | Remotion

- Created reusable typed APIs, motion components, animated charts, transitions, responsive formats, and deterministic rendering for data-driven video generation.

EDUCATION & LANGUAGES

Full-Stack Software Development Program - Workintech

2024 - 2025

Associate Degree, Computer Programming - Ufuk University

2017 - 2020

Languages: Turkish (Native) | English (Intermediate)
